

## **What is it about this role at Lloyds Banking group that interests you?**

There are a lot of elements that interest me about this role from the job description, but one of the key elements that really appealed to me is that I feel I would be a great fit within the company culture. I want to work in a progressive team and the collaborative of this company is something that interested me in this job. Looking over the company website, I believe this role would also give me the ability to progress in my career and develop my skills in a lot of different areas. I believe one of my core strengths is my ability to fit in well with any team and also that I can learn things really quick which is required for this particular role.

## **What do you feel you can bring to this opportunity?**

I can bring high levels of enthusiasm to the team, a can-do attitude, and the promise that I will learn the role quickly so I can start contributing to your business goals in super-fast time. I can bring a disciplined approach to tasks; a willingness to learn from experienced members of the company, and a determined, resilient approach to solving problems. Finally, I will bring an ability to multi-task, the quality of being able to complete challenging tasks and projects on time, and the assurance that I will always take steps to improve, grow and develop in the role.

**Use the next 2 minutes to tell us 5 interesting things about yourself. This can be a mix of personal and work related.**

As for hobbies outside of work, I like to design in photoshop. I have designed my college magazines for four years which are published during annual summit and awarded with a best designer certification.

I love learning new technologies. During my spare time I do research on new technologies and learn about them.

I had Volunteered Telanganaku Haritha haram event organised by state government planned to do 1 crore plantations in a day across the state. where me and my team contributed to the environment by seeding nearly 10000 plantations.

During my internship I got an appreciation from team lead for my can-do attitude and learning the things really quick which helped them to assign the tasks and get me in involved in the project. I would say, that is the proudest moment for me.

I used to learn new tools by watching YouTube videos as I can't afford the online courses. For my dedication to learn tools and contribution to the work, By the end of my internship My team gifted me with the online learning subscription which worth 350\$. That is the situation, where I understood about the value of dedication to work and personal life.

## **Tell me about yourself**

**Hi, thank you for inviting me for this interview. This is Shyam Nalluri, I recently graduated with a master degree in computer science and I am really excited about the prospect of this position. I am hardworking, professional and enthusiastic. I believe one of my core strengths is my ability to fit in well with any team and also that I can learn things really quick which is important for this kind of roles.**

**During my Academic projects, I have gained experience on cloud technologies like AWS and GCP on How to create Ec2 instances**

**, VPC's, manage s3 buckets, creating policies for IAM roles and also worked on projects where I have used python programming. As a part of my placement year, I have interned with Daaz Ltd and was able to work closely with DevOps Engineers, where I got lot of exposure to tools like GitHub, Gitlab, Docker, Kubernetes, Jenkins, Terraform and Shell Scripting.**

**Having studied and read the job description, I think I'm a great match for the essential criteria you have listed.**
