Suresh techs

At 12 o'clock?

Library?

- https://pypi.org/project/pywhatkit/

What is pip?

- Package manager for python
- Allows you to manage additional packages that are not part of standard library
- pip –version

- https://pypi.org/project/pywhatkit/

External packages support by notepad++

- Notepad++ may not support all external libraries

- Use python idle or pycharm

- https://www.jetbrains.com/pycharm/download/#section=windows

```
Traceback (most recent call last):
  File "C:\Users\YADAMS\Desktop\whatsapp.py", line 2, in <module>
    import pywhatkit as kit
ModuleNotFoundError: No module named 'pywhatkit'
```
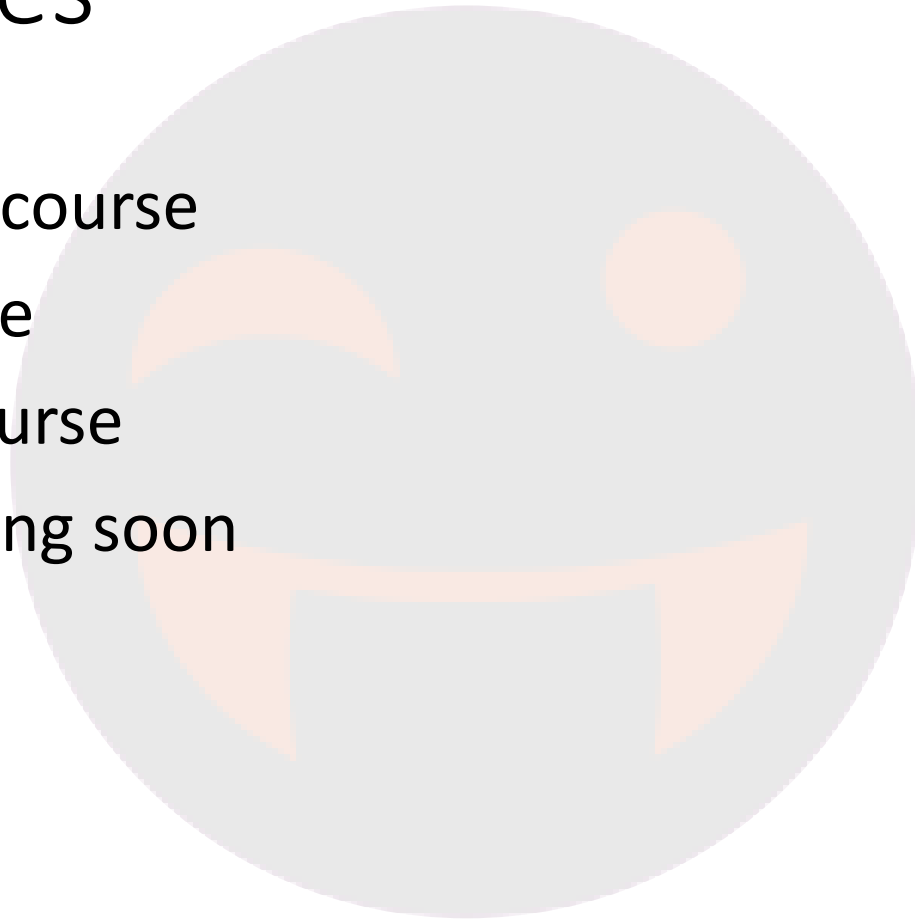

# What else?

- Much more using pywhatkit

Other courses

- Python 11 hours course
- Git 6 hours course
- HTML 5 hours course
- Much more coming soon

Final Program

```python
import pywhatkit

#Send message when you are sleeping.

#Send message at night 12 o'clock
pywhatkit.sendwhatmsg('countrycodephonenumber','Happy Birthday Friend',24,0)
#shutdown your system after two minutes of your wishes
pywhatkit.shutdown(120) #for two minutes.
```

PYTHON

చిన్న బ్రేక్

చిటికలో వచ్చేస్తా
